I need Chad to go to the box that the 3"x3" Sodium Iodide came in. I need him to scan in the documents associated with that particular instrument (i.e. all calibration docs). I might have to call the manufacturer.

Good morning Eric,

I was just checking in to see what the status was on the Kc/m conversions and if Lyndsay has been able to clarify our thresholds to generate new figures. Once we get it all figured out I can generate some new figures that show more detail as we had discussed previously. Thanks!

Patrick Buster
